Middle School Nurse: Lisa Kaplan RN, CSN (732) 946-4771, Ext. 255
lkaplan@collieryouthservices.org Fax# (732) 946-3519

Hello and Welcome to Collier School,

Nurse Theresa at the HS and Nurse Lisa at the MS have created this document to familiarize you with our role as your child's school nurse and to serve as a resource for you and your child. Our #1 priority at Collier is the health and safety of all students, their families, our staff and the community.

Our school nurses here at Collier Youth Services provide the following health services:

- ❖ Height, weight and blood pressure screening annually, medication administration, health counseling, first aid, vision screenings (grades 4, 6, 8 & 10), hearing screenings (grades 7 & 11), scoliosis screenings (biannually between 10-18 years old) and other medical care as needed.

On the CHS and CMS websites under the "Documents & Forms-Nurse Forms" tab you will find the following:

- The [Student Health History Form](#) is extremely important for the nurses to have updated information about your child. **This form must be completed annually.**
- The [OTC \(Over the Counter\) Medication Form](#), is available should you want your child to receive Tylenol, Advil, Tums or Benadryl while at school. **This form must be completed annually.**

Students are NOT ALLOWED to carry medication of any kind in school; this includes OTC (over-the-counter) medication, eye drops, cough drops, etc. Inhalers and/or Epinephrine Auto-Injectors may be carried with proper medical documentation and school nurse approval. Prescription medication MAY NOT be carried.

- [Medication Administration Form](#) - should your child require prescription medication to be administered at school
- [Asthma Treatment Plan](#) - if your child has asthma and requires medication in school.
- [Food Allergy Action Plan](#) - should your child be prescribed Epinephrine for anaphylaxis
- [Seizure Action Plan](#) - should your child require medical assistance during a seizure.

These forms must be completed every year by your child's physician and yourself. If you do not have access to a printer please let me know and I will send home a hard copy of the form(s).

For medication to be administered in school the following criteria MUST be adhered to: a completed medication administration form filled out by the physician with parental signature (must be completed annually). The medication in the original container brought to school by the parent (if parents cannot bring in the medication, the student will be allowed after verbal permission is granted from the school nurse).

- Additionally, on the CHS and CMS website under the “Documents & Forms-Nurse Forms tab, you will find documents related to [Sports Physicals](#).
- Current Covid-19 information and protocols can be found on the Collier HS and MS website under Covid-19 Resources
- All forms are on the Collier HS and MS websites under the tab “Documents & Forms-Nurse Forms” (link: <https://www.collierhighschool.com/parents-students/documents-and-forms>)

IMPORTANT:

- ❖ Students should not attend school if they are ill. Reasons for not attending school include, but are not limited to: vomiting and/or diarrhea within the past 24 hours, elevated temperature (>100.0) within the past 24 hours, strep throat, conjunctivitis, ear infection with drainage, influenza, or any other communicable (infectious) disease.
- ❖ If your child requires surgery or an extended absence from school due to a chronic or acute medical condition please notify the nurse directly. Medical clearance from your child’s physician will be required to return to school - physician notes must include dates of excused absences from school listing any restrictions or exclusions (if applicable), the date the student is medically cleared to return to school and if any prescription medications or specific treatments are needed.
- ❖ Students need a written doctor's note to receive prescription medication in school, to return from medical exclusion, to use crutches or other orthopedic device, accommodations/modifications during the school day due to ambulatory issues, or to be excused from Physical Education class due to chronic conditions (physician note must be updated annually)
- ❖ Parents should notify the school nurse immediately if their child has been diagnosed with food allergies, insect sting allergies, diabetes, asthma, sickle-cell, or any other potentially life-threatening illness.

Please note that prior to entry to Collier Schools all students must provide proof of immunization compliance in accordance with the NJ Department of Health. Immunization requirements can be found at: https://www.nj.gov/health/cd/documents/imm_requirements/k12_parents.pdf.

All students must provide proof of a Physical Examination within their first 30 days at Collier. A copy of a Physical Exam done within the past 365 days is acceptable. Forms to provide to healthcare providers can be found at: <https://www.nj.gov/health/forms/ch-14.pdf>

The Department of Health strongly encourages children with chronic conditions such as asthma, diabetes, or sickle cell anemia, to receive the Flu vaccine each fall.

Thank you for partnering with us to ensure the health and safety of your child and their peers. Please reach out to the school nurse at your child’s school for any questions or concerns.

We are looking forward to a great year,
Nurse Theresa & Nurse Lisa
